Hong Kong

Retail Foods

Highly Competitive Retail Sector Remains Stable

Approved By:

Alicia Hernandez

Prepared By:

Chris Li

Report Highlights:

In 2018, Hong Kong's retail food sector sales rose 4.2 percent to \$12.8 billion, a positive growth trend forecast to continue. Hong Kong is the fifth-largest export market for U.S. consumer-oriented agricultural products, by value. With a dynamic food culture, sophisticated buyers, and world-class logistical infrastructure, Hong Kong is an attractive market for innovative U.S. food and beverage products as well as a gateway to the region.

Post:

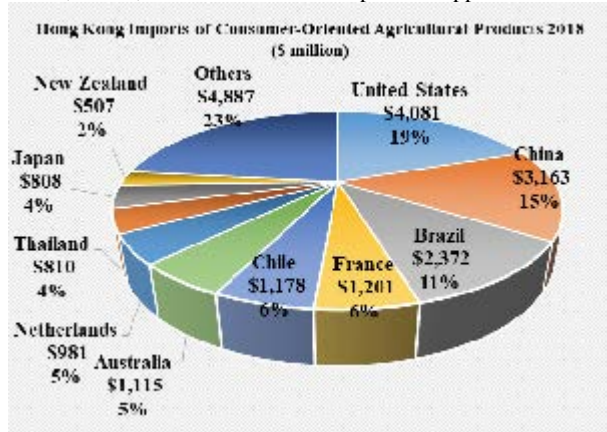

Hong Kong

Executive Summary

Hong Kong has a population of 7.48 million and its per capita GDP was close to \$49,000 in 2018, one of the highest in Asia. Hong Kong is a vibrant city and a major gateway to Asia. Consumers are sophisticated and enjoy cosmopolitan food and beverage tastes. Due to limited arable land, around 95 percent of food in Hong Kong is imported. In 2018, Hong Kong's total imports of agricultural and related products reached \$28.6 billion.

Imports of Consumer-Oriented Products

Hong Kong imports of Consumer-Oriented Agricultural Products reached \$21.1 billion in 2018, or 74 percent of overall agricultural imports. The more popular products imported were fish, beef, fresh fruit, dairy products, pork, wine and beer, poultry meat, tree nuts and vegetables. The United States, China, and Brazil were the top three suppliers.

Food Processing Industry

Land is limited and extremely expensive in Hong Kong. Therefore, the local food processing sector is small. Imports of bulk and intermediate agricultural commodities were \$416 million and \$2.24 billion respectively, representing 1.5 percent and 7.8 percent of overall agricultural imports.

Food Retailing Industry

In 2018, Hong Kong's retail food sector sales rose 4.2 percent to \$12.8 billion. The Hong Kong food retail market is made up of supermarkets, convenience stores, and traditional markets. Supermarkets account for nearly 56 percent of retail food sales.

Major supermarkets include Wellcome, ParknShop, DCH Food Mart, U-Select, CitySuper, CR Vanguard, AEON, YATA, SOGO and APITA. Major convenience stores are 7-Eleven and Circle K.

There are more than 800 supermarkets, 1,300 convenience stores and over 100 traditional markets in Hong Kong, making food shopping very convenient. Online food sales were \$167 million in 2018. This new form of shopping is expected to expand as rents rise, more product varieties become available on e-commerce platforms, and consumer confidence and trust in online stores grows.

Quick Facts CY 2018

Imports of Consumer-Oriented Ag. Products
\$21.1 billion

Top 10 Consumer-Oriented Ag. Imports
Fish, beef, fresh fruit, dairy products, pork, wine and beer, poultry meat, tree nuts, processed vegetables, and fresh vegetables

Top Growth of Consumer-Oriented Ag. Imports
Processed vegetables, fresh fruit, dog and cat food, wine and beer, snack foods, condiment and sauces, eggs, non-alcoholic beverages, fresh vegetables, and fish

Food Industry by Channels
Consumer-Oriented Ag. Products:

- Gross imports \$21.1 billion
- Re-exports \$9.3 billion
- Retained imports \$11.8 billion
- Retail food sales \$12.8 billion
- Restaurant receipts \$15.3 billion

Top 10 Retailers (by no. of stores)
Wellcome, ParknShop, DCH Food Mart, U-Select, CitySuper, CR Vanguard, AEON, YATA, SOGO and APITA

GDP/Population
Population: 7.48 million
GDP: \$365 billion
GDP per capita: \$48,958

Strengths/Weaknesses/Opportunities/Challenges

Strengths		Weaknesses	
- Large and free market with affluent customers.	- U.S. products are perceived as high-quality.	- Cost of shipment from the U.S. is high.	- Order size of importers is small.
Opportunities		Threats	
- Hong Kong customers are open to new products.	- Hong Kong is a major trading hub for Asia.	- Keen competition from other food supplying countries.	- Strengthening U.S. dollar will make U.S. products less price competitive.

SECTION I. MARKET SUMMARY

Total exports of U.S. agricultural and related products to Hong Kong reached \$4.2 billion¹ in 2018, making Hong Kong the seventh-largest export market by value. For U.S. consumer-oriented exports, Hong Kong ranked fifth in 2018, with exports reaching \$3.8 billion². Top categories for U.S. agricultural exports to Hong Kong include: tree nuts, beef, poultry meat, pork, fresh fruits, processed foods, seafood products, wine and beer, pet food and chocolate products.

In addition to being a dynamic market, Hong Kong is also a trading hub where buyers make purchasing decisions for a vast range of consumer-oriented products that are transshipped to China and other parts of Asia. Most of Macau's food imports are purchased, consolidated, and shipped via Hong Kong.

Due to land constraints, local agricultural production in Hong Kong is minimal. As a market which imports 95 percent of local food requirements, Hong Kong at large welcomes foods from around the world. The import regime is transparent. Food and beverage products are imported to Hong Kong without tax or duty with the exception of four commodities, namely liquors, tobacco, hydrocarbon oil, and methyl alcohol. For more information on Hong Kong food import regulations, please refer to [GAIN Report HK1830](#).

Hong Kong recorded per capita GDP of nearly \$49,000³ in 2018, one of the highest in Asia. However, food imports to Hong Kong are expected to grow at a slower pace in 2019 because of increasing uncertainties from the external environment. For the first four months of 2018, U.S. consumer-oriented exports to Hong Kong reached \$842 million, a drop of close to 30 percent. The Hong Kong economy expanded modestly by 0.6 percent in the first quarter of 2019 compared to a year earlier. The Hong Kong government has forecast the economy to grow 2-3 percent in 2019⁴.

Food and Beverage Retail Sales in Hong Kong

The Hong Kong food retail market is made up of supermarkets, convenience stores, and traditional markets.

Table 1 – Food and Beverage Retail Sales in Hong Kong (\$ billion)⁵

Channel	2014	2015	2016	2017	2018	Share (2018)	Growth (18 vs 17)
Supermarket/Dept. Stores	6.58	6.74	6.80	6.85	7.12	55.6%	+3.94%

⁵ Hong Kong Census and Statistics Department

“Supermarket/Department Stores” include sales of supermarkets, convenience stores, and food and beverage sections at department stores. They are the modern grocery outlets that provide consumers with convenient and high-quality options. In addition to groceries, these stores are offering a more comprehensive shopping experience with increased items of fresh food, bread and pastry, organic options, and hot takeout meals.

“Other outlets” refers to the traditional markets, also called wet markets, mom-and-pop stores, bakeries, fresh fruits stalls, etc. These outlets are usually smaller in scale and U.S. food exporters probably need to work with local importers/agents to place products in this sector of the market. Some Hong Kong consumers prefer these stores due to proximities, established relationships, and perception that meat, fish, and produce in traditional shops are fresher.

Chart 1 – Food and Beverage Retail Sales in Hong Kong (\$ billion)⁶

As reflected in Chart 1, supermarket sales have been taking market share from other outlets - from 44 percent of total retail sales in 1995 to 55.6 percent in 2018, and the trend is expected to continue.

⁶ Hong Kong Census and Statistics Department

Table 2 – Major Advantages and Challenges in the Hong Kong Market

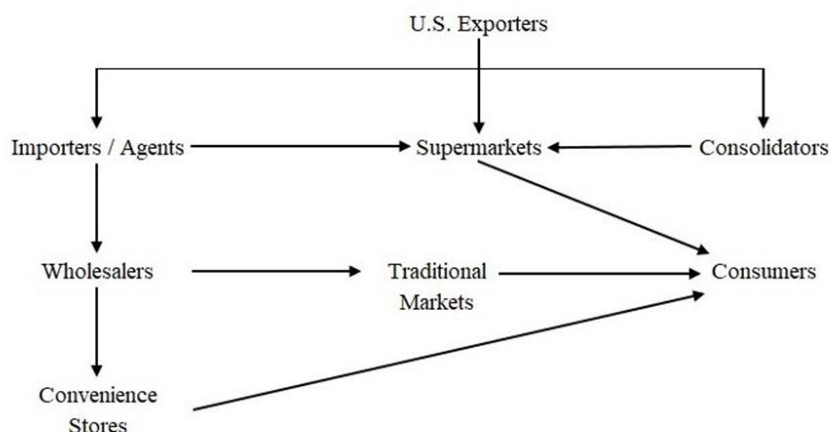

Advantages	Challenges
Hong Kong is one of the top markets in the world for food and beverages, processed, fresh, and frozen gourmet products. U.S. exports of consumer-oriented agricultural products to Hong Kong were \$3.8 billion, making it the fifth-largest market for the United States in 2018.	Transportation time and costs, combined with seasonality determining product availability (e.g. fresh produce) associated with importing U.S. food and beverage products to Hong Kong can make them less competitive than products available from regional suppliers such as China, Australia, and New Zealand.
Hong Kong is a major trading hub where buyers make purchasing decisions for a vast range of consumer-oriented products that are transshipped to China and other parts of Asia.	The importance of Hong Kong as a transshipment point and buying center for regional markets is not widely known to U.S. exporters.
U.S. food products enjoy an excellent reputation among Hong Kong consumers, as they are renowned as high-quality and safe.	Strengthening U.S. dollar will make U.S. products less price competitive.
Hong Kong is a quality and trend-driven market so price is not always the most important factor for food and beverage purchases.	Hong Kong labeling requirements and residue standards can impact trade.

SECTION II. ROAD MAP FOR MARKET ENTRY

New-to-market exporters may consider several approaches to enter the Hong Kong retail market:

- Establishing a representative office in Hong Kong: A good method to build trade relationships and implement marketing programs, but operating expenses can be high.
- Working with a U.S. trading company: Some companies serve U.S. exporters and Hong Kong importers so both sides can benefit from expanded options and cost-effective shipping.
- Developing a relationship with a Hong Kong agent: Well-established companies have extensive distribution networks to supermarkets, other retail outlets, and many also cover non-retail sectors. Hong Kong agents very often request exclusive sales rights. This is common in Hong Kong due to the small geographical size.
- Exporting direct to supermarkets: Branded products that sell direct to supermarkets may be required to provide exclusive rights for the products in Hong Kong. In this case, expensive slotting fees may be waived. For non-branded and large turnover products, supermarkets tend to buy direct from overseas exporters for cost savings.

Market Structure

- U.S. exporters intending to sell to retail outlets can utilize one of the above channels. Some supermarkets source through U.S. consolidators as well as local agents and importers.

A. Supermarket

Two major grocery chains, Wellcome and ParknShop, dominate the supermarket category with nearly 70 percent market share combined⁷. Both chains recently expanded their premium and upscale outlets as consumers continue to seek high-quality, imported gourmet products.

Table 3 – Leading Supermarket Chains⁸

Name of Retailer	No. of Outlets
Wellcome	Over 320 (with different names and store formats)
ParknShop	Over 270 (with different names and store formats)
DCH Food Mart	Over 48 DCH Food Mart & DCH Food Mart Deluxe
U-Select	46 shops
City' Super	21 (6 on food)
CR Vanguard Shops	17 shops
AEON Stores (HK) Ltd.	9 department stores with supermarkets and 2 separate supermarkets
YATA	3 department stores with supermarkets and 8 separate supermarkets
Sogo	2
APITA (Uny)	1

⁷ Euromonitor International

⁸ Websites of the retailers

Recent expansion of health food, confectioners, and chain stores such as “[759](#)”, “[Kai Bo](#)”⁹, “[Best Mart 360](#)” and “[PrizeMart](#)” are increasing competition for supermarkets and convenience stores.

Many Hong Kong supermarkets charge slotting fees for new products’ placement, as well as other terms, such as promotion discounts, back-end income (flat rebate per year that a supplier pays to the retail chain based on the annual turnover), D.A. (Distribution Allowance - the fee that the supermarkets charge for distributing the products from its warehouse to its many branch stores), and incentive rebates (a percentage of turnover rebated to the supermarkets when sales exceed an agreed amount).

To source new products from the United States, supermarkets may import direct from a U.S. supplier or may use consolidators, depending on the product and minimum order quantity. Most major supermarkets like ParknShop and Wellcome offer online grocery shopping platforms that are increasingly appealing to busy Hong Kong shoppers with discounts and delivery services.

B. Convenience Stores

Convenience stores, such as 7-Eleven and Circle K are very popular in Hong Kong with more than 1,300 outlets that offer drinks and snacks and some hot food options.

Table 4 – Profiles of Leading Convenience Stores in Hong Kong¹⁰

Retailer Name	No. of Outlets
7-Eleven	Over 900
Circle K	Over 360

C. Traditional Markets – Wet Markets and Independent Grocery Stores

Traditional markets include wet markets and mom-and-pop shops. They are widespread throughout Hong Kong. They are favored for daily, neighborhood shopping especially amongst an older consumer base. Due to size restrictions, many of these stores work with importers to buy smaller batches.

D. Online Shopping of Foods and Beverages

There are more than 800 supermarkets¹¹, 1,300 convenience stores¹² and over 100 traditional markets¹³ in Hong Kong, making food shopping very convenient. Online food sales reached \$167 million¹⁴ in 2018. Hong Kong consumers are information savvy, with nearly 100% smartphone users and 5.2 million Facebook users. Many food retailers and e-commerce platforms such as [HKTV Mall](#) provide modern and alternative shopping experience to Hong

Kong consumers. This new form of shopping is expected to expand as rents rise, more product varieties be available on e-commerce platforms, and consumers grow more confident in the quality and authenticity of products available online.

SECTION III. COMPETITION

Due to land constraints, Hong Kong produces a minimal amount of its food requirements, depending on global sources to meet about 95 percent of its needs. Hong Kong imports of Consumer-Oriented Agricultural Products from all origins reached \$21.1 billion.

**Table 5 – Hong Kong Imports of Consumer-Oriented Ag. Products
